Project: Customer Retention Analysis

Document Type: Business Requirements Document (BRD)

Version: 1.0

Date: June 2026

Customer Retention Analysis - BRD

Problem: Customers are not making repeat purchases.

Goal: Identify at-risk customers and retain them.

My Role: Business Analyst

Stakeholders

Name	Role
Marketing Manager	Wants to know which customers to target
Data Analyst	Pulls the data
Product Manager	Takes final decisions
Business Analyst (Anusha)	Analyzing and documenting

Business Objectives

1. Identify customers who make only one purchase.

2. Analyze customer retention by city.
3. Analyze customer retention by product category.
4. Identify customers at risk of churn.
5. Provide insights to improve repeat purchases.

Scope

In Scope:

- Customer order analysis
- Customer segmentation
- Review score analysis
- Retention analysis

Out of Scope:

- Payment system changes
- Website redesign
- Marketing campaign execution

Functional Requirements

ID	Requirement
FR01	System should identify one-time buyers
FR02	System should show customer purchase frequency
FR03	System should display average review score by

	category
FR04	System should identify churn-risk customers
FR05	System should generate retention reports

Non-Functional Requirements

ID	Requirement
NFR01	Dashboard loads within 3 seconds
NFR02	Data refreshes every 24 hours
NFR03	System supports 100K+ records

Assumptions

- Dataset is accurate.
- Customer data is complete.
- Marketing team will use generated insights.

Risks

Risk	Impact
Missing customer data	High
Incorrect data	Medium

Low stakeholder adoption	Medium
--------------------------	--------

Success Criteria

- One-time buyers identified successfully.
- Churn-risk customers identified.
- Actionable recommendations generated.
- Dashboard created for stakeholders.
